## Residential New Construction Partner of the Year

### Alan and Nancy Benoit, Sustainable Design, LLC

Alan and Nancy Benoit of Sustainable Design, LLC, have partnered with Efficiency Vermont's Residential New Construction (RNC) program for many years in order to provide the latest in energy-efficient design to their customers. As of late 2017, they had three projects enrolled in the RNC program. The company has consistently outperformed with superb building envelope details, an openness to change, and a desire for continuous improvement.

Always eager to share what they have learned, the Benois have been leaders in the Southern Vermont high-performance design and building community. In addition, they routinely consult with the Bennington Area Habitat for Humanity chapter to deliver energy efficiency to those homeowners who need it most.

Sustainable Design, LLC, has a broad focus that encompasses energy efficiency and community outreach, truly living up to its name.
